No. 74-75

TITLE/SIGNIFICANCE:

Suuji E - New Chinese Radar

COMMENT: A very large Yagi array antenna has been identified in Northeast China. The radar is similar to the CHOP REST/Suuji B/D radar. The lattice support boom appears to be in two sections and has ground, and is mounted on a rotatable base. The antenna consists of ten element supports along the support boom, five on either side of the support boom base.
